Electronic patterns

Beloved children of My Heart:

The Great Creator, in His multiple mercy and kindness created the electronic pattern of each individual different and distinct so that all might enjoy a certain individuality and beauty of form. The electrons of each such individual differs in their elemental structure like unto the snowflakes. Each pattern and form represents the Identity of The "I AM" Presence which will manifest through the Holy Christ Self in Its fullness through the outer self as the three become One: (The Holy Trinity).

As you have been often told before the pattern of the electron of Ascended Master Saint Germain is represented by the Maltese Cross; that of The Lord Guatama Buddha is the open Lotus; that of The Beloved Regent, Sanat Kumara is the perfect Star of Love and Peace. This means that all of the electrons which make up Sanat Kumara, Beloved Saint Germain and Lord Gautama's bodies are countless myriad replicas of the Forms mentioned above through which the Light of God always flows in the prismatic colors of the rainbow.

All the God Energy that They draw from the Body of God, the Unformed, once It has come under Their conscious control is immediately stamped with These patterns and wherever It proceeds in the Universe (directed by Their thoughts, feelings, spoken words and actions) these electrons will carry the outline of Their Particular Pattern.

In like manner, all the God Energy which each chela draws from the Unformed immediately takes on the form of his or her own electronic pattern. This is how, as the Energy proceeds in its circular activity and returns, following the Law of the Circle, to you with added power that there is a Selective Intelligence by which the Divine Beings are enabled to assort, so to speak, the emanations of mankind, one from the other. The Energy drawn from the Universal God "I AM" which is a voluntary activity comes into the use of the outer consciousnesses who dispenses that Energy freely in thought, feeling, spoken word and action. The personal self does not always see that Energy, nor his mark of ownership upon It, and feels that he can send forth that Energy indiscriminately without rendering an account therefor. Every thought-form, feeling-form, word and activity of the outer-self carries that stamp which identifies the Energy with the person who drew it forth, qualified and expended it. This moves in a circle and returns to its source for redemption, bringing with it other energy of its kind.

All of the places on Earth where the Elect have sought God, The Universal "I AM" and achieved their Victory yet contain much of the Essence of that individual and it is conducive to the raising of the consciousness of all seekers. For instance, the place where The Lord Guatama Buddha received His Illumination is so Spiritually charged with the Cosmic Lotus symbol of His Lifestream that all who come into the vicinity feel a definite effect from His Consciously drawn radiation.

If every serious chela would daily charge the so-called inanimate objects in and around him with the Violet Transmuting Flame he would one day be amazed how, even those things he has discarded, can and will be a Spiritual impetus to souls he knows not of through the radiation charged into them by the Pure Electrons of his own Life-Wave. Service should always be so universal, and daily living can make Talismans out of every form loaned to you for the enrichment of all life. Some chelas are particularly sensitive to the blessing of the inanimate form and the Nature Kingdom and it is well to encourage one's talents along these lines.
